THE DOLLAR BILL AND ICE CUBE CHALLENGE!

How can you lift a piece of ice from a
glass with a piece of string without tying
any knots?

Secret—first wet the end of the string
thoroughly and lay it on the ice. Now
sprinkle some salt on the ice and string.
Wait ten seconds and lift the string. The
ice will be frozen to the string!

How can an ordinary dollar bill, when
placed like a bridge between the
tops of two glasses, support
a third glass?

Secret—just fold the bill
in pleats as shown
in the picture!
